RailWay

## GANTREX™ Pit Track GPT for maintenance facilities

Well-maintained systems are key to running a successful railway. It is crucial to build pit tracks with reliable and resistant materials.

### The all-in-one solution for embedded & anchored pit tracks

The GANTREX™ Pit Track multi-component system includes clips, pad, electrical insulator, steel column and grouting material. This Gantrex' engineered solution responds to market demands in terms of easy installation and compliance to safety standards.

# Railway expertise

Exclusively designed for your technical needs and requirements

## Bespoke solution

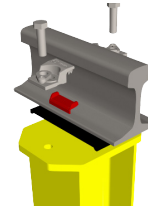

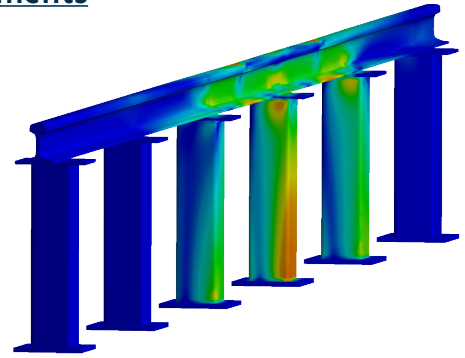

Gantrex adjusts its pit track system to your needs in compliance with the latest standards.

## FEA designed

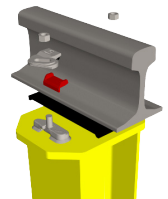

Everyday, our engineering department faces new challenges to optimize systems to offer you a customized applications whilst reducing costs. We also provide calculations for fatigue and seismic conditions.

## Technical expertise

In addition to the materials and assembly & layout drawings for the tracks, Gantrex also offers a full calculation report.

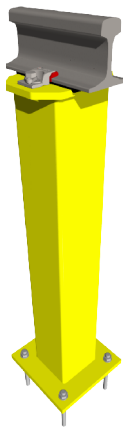

Boltable clips

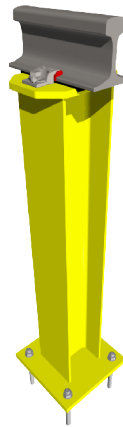

Weldable clips

## Our products

- Large lateral adjustment of the rail with the GANTREX® welded or boltable clips.
- Electrically high insulation thanks to the GANTREX® insulator clip. Greater insulation with the GANTREX™ membrane.
- High lateral load capacity
